Digital marketing was the focus of several marketing strategies and business models in the 20th century. It was the basis for many of the main marketing automation platforms used in 2006 and is still a topic of interest. Email, search, social media marketing, and many mobile apps are built on top of a foundation of strategies and protocols. Facebook, for example, was designed as a system of Pages and Groups, which are digital presentations of companies, brands, and people. Much of the content on these pages is written and produced by these digital marketers, and thus they compete with other companies for the limited time audiences of these networks. How Digital Marketing Has Transformed Our Lives Donald Trump Uses Digital Marketing to Make Himself Rich In which Emily examines a topic which is rarely discussed on Mental Floss.
