It is hard to find a better deal for virtualization software these days. A new version of VMware's converter has been released, and it is more powerful than ever. It is able to manage not only Windows, but also Linux and Mac OS X operating systems on top of the usual Windows, the mainstay of most businesses. This tool gives businesses a huge advantage in terms of cost savings while at the same time expanding their virtual environment size exponentially with no worries about going over any allocated hardware limitations. # How To Download VMware Vcenter Converter 5.1
