
OSX86 ISO HAZARDtorrent

iso and booted and burned it.so its only 3 iso's that i installed and booted,the boot .iso,the chameleon iso,and the install iso.the chameleon iso is the only one that has the ubuntu installer does anybody else have problems with the network manager? I cannot get rid of it... jiohdi: uninstall it from "System" -> "Preferences" -> "Appearence", if it's there. jiohdi: or do "sudo apt-get remove network-manager-gnome" thanks, I will try that something like that is a reasonable help... i want to make a bash script that reads all my files a and b and see if they have the same name then delete them cdoublejj, why delete, just move them to a different folder? aufwiedersehen hi mv bla bla bla /folder/notinoptical/in/optical I need to find the quickest way to add an SSH key to an Ubuntu machine i want to make a bash script that will read all my files and delete them a and b if they have the same name then move them to a folder called sth I've tried doing ssh-copy-id user@machine, but it keeps rejecting it And I think I remember having the same issue before find / | grep... | sed's/\./' | xargs mv /home/user/folder/* /new/folder/ what is the output of the ls command? in what folder cdoublejj, see above. no bash script only regular shell cdoublejj,
