what is xml dom document 3.0 msxml2 dll what is xml dom document 3.0 msxml3.lib what is xml dom document 3.0 msxml2.lib 26-Oct-2016 xmlDoc = new ActiveXObject("Msxml2.DOMDocument.3.0"); needs to be 'false'. 15-Feb-2016 xmlDoc = new ActiveXObject("Msxml2.DOMDocument.3.0"); xmlDoc.async = false; xmlDoc.load("books.xml"); if (xmlDoc. . Microsoft. Cannot be displayed to a client. A: You can use xmlDOM from : //create a dom object \$dom = new DOMDocument(); //load file \$dom->load('Books.xml'); //create an object for getting the name of the XML file \$domXML = new DOMELEMENT(\$dom, "xml"); \$domXML->setAttribute('filename', 'Books.xml'); //get names of nodes \$nodes = \$domXML->getElementsByTagName("book"); \$names = array(); foreach (\$nodes as \$node) { \$names[] = \$node->getAttribute("name"); } //output the results echo " "; print_r(\$names); Trinidad & Tobago's musical evolution shows no signs of slowing down. In the space of a few years, it has gone from having the smallest capacity for live music to being one of the most dynamic markets in the region. From large-scale venues such as the recently opened Tobago Jazz & Blues Festival, and grassroots home-grown events like Coconut Jamboree, the scene has exploded. The landscape is shifting from an established system with limited options to a growing market with exciting new opportunities. And the scene is no longer just for the crème-de-la-crème of local musicians, there are now countless numbers of local acts, and foreign acts, coming to the island. The process of broadening the scope of the music scene on T&T is not only a welcome evolution, it is also one that will benefit the entire economy, not just the music industry. Local 2d92ce491b
