Download Pippa: The Tribute Album by The Smiths (2010) Subtitle from a database of Sherlock S01E00 Unaired Pilot 720p Brip Eng Subs . Download Sherlock : Season 1 Unaired Pilot 720p Brip Eng Subs English Version.rulsserker.comQ: Parsing a string variable to a specific format and writing it into a text file I want to parse a string variable which is assigned to a list of lists to a format like so: element_array=[['element1_cat_name','element1_cat_description','element1_cat_color'],['element2_cat_name','element2_cat_description','element2_cat_color'],['element3_cat_name','element3_cat_description','element3_cat_color']] Where each element is a list and the strings are all variables which are assigned to a list of lists. I have been trying to achieve this for a couple of hours without success. I found the solution myself. This is what I wrote:
string1="element_array=[['element1_cat_name','element1_cat_description','element1_cat_color'],['element2_cat_name','element2_cat_description','element2_cat_color'],['element3_cat_name','element3_cat_description','element3_cat_color']]" filepointer =open(r"C:\Users\Michael\Documents\Python\Pfaffenbrot\Pfaffenbrot.txt","w") d4474df7b8
