Since the population of all users cannot be measured and there is no particular number of paid users, therefore it is not practical to measure free users and paid users from statistics. The chart reflects a rough estimate of statistics and not an official measurement. Having all the Users displayed is the number of accounts registered on the OpenVPN server. As it is estimated, the count is not 100%. Security features The super VPN server is highly secure, making it widely used in internet cafes and coffee shops. Some of the security features included: Transparent proxy OpenVPN server has its own server application that offers powerful facilities and features for the customers. The main facility provided to the users is the transparent proxy. In openVPN, using a . Transparent proxy in "transparent" mode allows users to browse the net with a different IP address. The proxy is transparent because the user is not aware of the proxy, and only the application is aware that it is using the proxy. The user's IP address remains unchanged; all the ISP does is to forward the connection to a server of the VPN company. Server level encryption The connection is secured by encrypting all the traffic by using 256-bit SSL/TLS protocol and IPsec. User Authentication The user's credentials are stored on the server. The server can be accessed by using any user ID and password. User Interface The client is a graphical application that can be accessed from anywhere. The application itself is designed to be more functional and user friendly. Commercial products The first service provided by the company is free for registered users. There are also commercial products offered to the users who are willing to pay. The service offered by the company is a virtual private network that has various security and networking features. The users can connect to the VPN server from their computer, Android phones or any other devices that supports OpenVPN protocol. Background and history Gaminator Super was started in August 2007 by Asit Kaul, a software engineer. Asit started the company with Rs. 30,000 he had saved from his previous job as an engineer. The company currently employs six engineers. The company's servers were created by a man named "Sasha", a hardware engineer who designed the servers with the help of a friend. Sasha was selected as the head of engineering in 2010. Gaminator Super's servers are based in India, because the servers can be more secure 2d92ce491b
