Textosaurus is an easy-to-use, text-only text editor and IDE. It has built-in support for multiple programming languages, and is a good choice for developers looking for a notepad replacement. Textosaurus Review Textosaurus is an easy-to-use, text-only text editor and IDE. It has built-in support for multiple programming languages, and is a good choice for developers looking for a notepad replacement. Textosaurus has been described as "an easy-to-use, text-only text editor and IDE", and is a good choice for programmers. Key Features: Support for various programming languages, allowing you to edit your code in a tabbed text editor with syntax highlighting, and copy and paste values between a variety of languages. Tabbed editor Built-in code browser Text manipulation: Tabs support case-insensitive search Text searches Document encoding detection and conversion External script support Favorites section and Favorites tab Tabbed file manager Open file button Settings and Options: Window state and shortcuts Keyboard modifiers Themes File extensions detection Settings Keyboard shortcuts Favorites and Favorites tab Text Colors and Background Colors tab Text Styles tab Text Styles dialog Text formatting options Window state and keyboard shortcuts: Textosaurus has two window states: maximized and minimized. If you prefer a different state, you can easily toggle between them using the shortcut key Ctrl+T on Windows and ⌘T on Mac OS X. It is also possible to disable the window maximization with a global keyboard shortcut, e.g. 'M' on Windows or 'Option+⌘T' on Mac OS X. Keyboard modifiers: Textosaurus supports a number of keyboard shortcuts. In addition to the standard Windows and Mac OS X keyboard shortcuts, the application comes with some custom shortcuts, allowing you to perform tasks more efficiently, and to control the application easily. For instance, the Shift-Insert command inserts a new line. The Shift-Delete command removes a selection. The Ctrl-H and Ctrl-F commands are useful for finding text in a document. The Ctrl-T and Ctrl-B commands are used for tabbed navigation. The Alt-A command is used for moving the caret, and
