For now assume that the question is limited to two games, instead of the one above I'll ask more questions. Which of these games has the highest frequency of A vs B? Which of these games has the highest frequency of A vs B? Which of these games has the highest frequency of A vs B? Which of these games has the highest frequency of A vs B? What is the difference between an ordinary battery and a flow of electrons? What would I do if I have a flow of electrons in a circuit? Could I use a flow of electrons to power light bulbs?
