Cons - Can be slow. - Can take a long time to complete all the updated. Ads

How to use it? The DNS-O-Matic Updater is available on the following pages: Once installed, the DNS-O-Matic Updater is quite simple to use. To update a service you just have to go to its web page (using the address given in the table) and press the button "Check DNS...". The DNS-O-Matic Updater will retrieve the latest available version of the service and compare them with your current installed version and update them if they are different. You'll be notified when the process is finished with a success message. For each updated service the last URL of the official web page will be given with the following examples: About the author Since 2003, Yuri discovered and worked on a lot of open source projects. He's currently working as a freelance web developer. In the early 2000s, he worked on the French translation of OpenOffice.org. Since 2005, he actively contributes to Webmin and OpenVPN.

---
