Devil's In The Trees Devil's in the Trees Vanishing Streams No. of episodes: Episodes: This web site is dedicated to the memory of Bill and Peg Mulholland (pictured at right), whose unceasing efforts to save the rapidly vanishing Central Valley rivers and streams, representing some of the most ecologically and culturally significant rivers in California, have drawn worldwide acclaim. To date, the work of the Mulholland Foundation for Water has protected over 40,000 acres of coastal plain, wetlands, forests and streams. Since the publication of The Central Valley in 1970, the popularity of this book has soared - a poll in 1977 stated that over 100,000 people had bought the book to date, and today, the book is in its 20th edition, and 12 million copies of it have been sold worldwide. In 1990, the Mulholland Foundation was created. What follows is a recapitulation of the story of the Mulholland Foundation for Water and its continuing campaign to protect this extraordinarily valuable and irreplaceable coastal plain and coastal ecosystem, located midway between San Francisco and San Diego. The Central Valley of California is a stark landscape, an area of once vast wetlands and now largely desiccated river beds and salt marshes. It has a rich history: it was here that the first Spanish settlements in California were established in the sixteenth century. The region's rich and fertile soils, first populated by the Chumash in the early part of the last millennium, provided the central valley with one of the most productive agricultural systems in the world. And today, a major part of the valley is still irrigated by water in mains brought in from the Sacramento and San Joaquin River watersheds to its eastern and western flanks, respectively. But the story of the Central Valley is not simply a tale of drainage and agriculture. It is about the places at the valley's edges, in the foothills and in the hills. These lands, once covered by forests and wetlands, are now nearly all gone. The tall, broadleafed hardwood forests that once dominated these landscapes have largely been denuded of their trees, and the intact wetlands that once supplied the watersheds with their fertile soil - the lifeblood of the valley - are
