Batch Picture Protector [Mac/Win] [Updated] 2022

Batch Picture Protector is a program designed to help you tag your images and artwork by adding transparent watermarks that combine text, graphics and illustrations. The software comes with a clean interface that lets you preview the output of your work. It enables you to create as many watermark samples as you want, regardless if they are text or graphic, and it allows you see how they look on your pictures. Watermarks are also very easy to edit. For example, you can modify the position, offset, transparency and size. When text is involved you can also fiddle with the font type and size, as well as add a background color or a glowing effect. Batch Picture Protector lets you add multiple tags to a picture by simply ticking the checkboxes next to them. Even though the positions can be predefined for all watermarks, the software lets you drag them in any spot on the picture, so you can find the best position for each item. In order to help you finish work faster, the app offers the possibility to save multiple photos at the same time. Therefore you can apply the same watermark to all the images in the file queue. This software can work with various file formats, such as JPG, PNG, GIF, PSD, BMP, PCX, TGA, ICO, TIFF and WMG. Also, it supports multiple languages, such as English, Italian, German, Turkish, Arabic, Japanese, Hungarian, Farsi and a few others. All in all, Batch Picture Protector is a nice, simple-to-use app, with a clean interface that can help you protect your pictures against unauthorized usage. The program is intuitive and should be easy to understand even by the less-experienced users.
