May 12, 2017 I installed the FS-SM100 driver for windows 10. I get this message every time i start the device. Flysky SM100 USB RC Helicopter Airplane Simulator for Flysky FS-i6 FS-i4 FS-TH9X FS-T6 FS-T4B FS-GT3 FS-GT2 Remote Controller. What to do? Help! A: After installation of the Flysky SM100 USB cable, I applied the drivers from the respective website, where the device is registered. I saw that the device is registered as ICS-BRI827(Device code:0023). I downloaded the drivers from the following website. I downloaded the.inf file ICSBRI827.INF and.sys file ICSBRI827.SYS from the above website and placed them in the root directory of the USB. Then, the Flysky device starts working. A: Check if the device name is the same in the driver that you get from the manufacturer, that is usually done in the protocol of the driver that you can download for the same type of device and same protocol. For more information about what is the correct name for a device you can always search for the specific protocol on the manufacturer's website. I'm trying to set up a local replica of a MongoDB service in Cloud Foundry. The problem is this, when I run the command mongo admin I get the following error: connection failed: admin - JavaScript execution failed: Error: connect ETIMEDOUT The first version of the app works fine on the localhost, when I set the hostname to aip.me In this scenario everything works fine, but when I try to connect to the hostname localhost I get this error.
