Registry Troubleshooter: Tries to help you resolve problems with the Windows Registry. Please submit all non-working items in the order you experienced them. As a rule of thumb, the program works best when all items are listed in the order they appear in the Registry. When submitting a problem, provide information such as your operating system, version, screen resolution and monitor type. If you are having problems with an antivirus program, provide the version and the AVG, Avast, AVGW, or Comodo, name of the program and let the program run in silent mode. The registry is the last thing we would want to disrupt, especially if it will cause any of your files to stop working. KEYMACRO is a powerful macro editor with a memory area of more than 5 MB. Create and run special macros, record sound clips, copy text, change the window size, convert text to uppercase, record moving objects, open and save files or folders, and more. Define a macro, record the actions you want to repeat and run it anytime you want. Easy. Add multiple macros at once: One click on the play button, and you have five macros, ready to run. Use the easy-to-learn and self-explanatory interface. Store large files, such as video, voice, and image files, in the program's memory area. (The memory area is not limited to macro files. You can store text files, HTML files, and any other file type in the memory area.) Record audio clips or video clips. Use the built-in audio player to preview the recorded audio or video clips. Change the program's window size, whether it be maximized or minimized, and resize the entire memory area as needed. Use the Clipboard, Paste, Undo, and Redo functions. Support Unicode. Create macros that can support multiple languages, including Japanese, Korean, and Chinese. NOTE: The Macros may only run when running the KEYMACRO application. Your computer may not run any other program while running KEYMACRO. Gather Information About Your Computer with IdleTimer Description: A very handy application for anyone who wants to keep track of the amount of time they spend watching videos, surfing the internet, or playing games on their computer. IdleTimer works in the background of your computer and tracks the time you spend using your computer. The utility

reports the time spent watching video, the amount of time spent on the Internet, the amount of time spent in the computer games and the amount of time you spend browsing the Internet. IdleTimer keeps track of the amount of time you spend watching videos, playing games, surfing the Internet, using the computer for email, chatting and other computer functions. The application keeps track of how long you have been on your computer, as well as how long you spend each day on your computer. The program is simple to use and does not have any complex menus. The program will display a small window in the middle of your desktop that will show the time elapsed on the computer and your computer usage statistics. There is also an icon that will show the current elapsed time, total time, and the daily 77a5ca646e

Registry Help Pro is a software program designed to help you tinker with the Windows Registry. It can be handled by both first-time and experienced users. The tool is packed in a user-friendly interface. Registry Help Pro can scan the Windows Registry for any errors revolving around the registry integrity, startup programs, help and resource items, shared apps, device drives, software locations, COM, OLE and ActiveX areas, just to name a few. Once the scanning procedure is done (standard, complete, or custom), you can check out a list with the description, key and value name, data and type of each issue. Plus, you can make the app skip removable disks, CD-ROM, RAM disc, network path and unknown or invalid drives. Simply select which registry entries you want resolved and let the tool take care of the rest. Additionally, you can copy key names, value names and value data, as well as open a key in Registry Editor and create an ignore list. Furthermore, you can perform a defrag task on the registry in order to optimize it, browse the registry, create snapshots and compare them, use a search function, tweak the list of registry entries (e.g. application auto-load DLLs, IE search URLs, menu popup speed), as well as backup and restore data. The program runs on a low amount of CPU and system memory, is pretty responsive to commands and quickly finishes a scan and fix job. Registry Help Pro did not cause us any difficulties during our evaluation, such as causing the operating system to freeze, crash or pop up error dialogs. Thanks to its intuitive layout, the app's features can be easily figured out. Registry Settings Registry Settings is a software program developed by Novalux S.L.
