Occasionally I buy games on Steam, which prompt me to download a long-running upgrade when I launch them. Is there a way to cancel these upgrades? (For example, while a game is installing, I have other games to play.) Otherwise, once the upgrade process starts, is there a way to get back to the last version of a game? A: I had to find this question after a quite lengthy upgrade. The short of it is that you don't need to do anything except read the description that pops up, 'Open the folder containing the game'. LOS ANGELES — The Police Department's decision to stop using a controversial crime database will force it to close or reassign 35 police stations within the next three years, as officers increasingly deploy cellphone videos of serious crimes as evidence in their investigations. More than 200 police officers will have to be transferred to new stationhouses by the end of the year, according to police officials, most of them from the department's Southern Division, which serves the city's poorest areas. The force's leadership is warning that even more officers may have to be moved to less desirable districts by the end of the year. The upheaval is a result of the department's dropping of its contract with a private

firm, Clearview AI, after the company released a video last fall that showed an officer making a racially charged remark to a black woman, at which point she was arrested. The footage was released by a private group critical of police officers' use of the tool. The LAPD requested that all sworn officers be made to clear their "stops" in the data set, which was designed to connect crime patterns to cellphones. The unit identifies individuals within those patterns, using their cellphone numbers to create a map.
