What's New In Photoshop 2021 (Version 22.4.1)?

Another year, another set of leaked or hacked images. This time around, they're being shared by Norwegian website Information, a fairly reputable source. While some of the imagery still doesn't make a lot of sense, given rumors of a 4k, 8k and higher sensor back when it was first rumored, there are some valid shots of what might be a Skylander. Also note, that is a screen shot of what is supposed to be a Skylanders 2 launch graphic. It's a blurry thing, but at this point, we're assuming it's legit. More on the next page. It should be noted that while there are official Skylanders available, Activision isn't doing anything official with a direct Skylanders 2 experience at this time. The official portal is just for the new toys. More than likely, this is a early concept design. 10-year-old you, you would have been way too excited for this. Before we go any further, it's worth mentioning that other rumors have appeared from other sources. After all, Twitter is the perfect place for that. I'm actually not much of a seamster. Is something happening with Sea Skylanders! #SKYLANDERS2 — Skylanders (@Skylanders) July 18,
