## **What's new in Fifa 22:**

- 
- **Easy Access to Innovation:** Starting with this year's "Muscle Memory" engine, players can now learn sequences with ease and memorise and apply them in-match.
  - **Player Confidence:** Be that dedicated striker who always scores or the tactical master, changing and tinkering with your tactics mid-match by uploading and switching cards on the fly. Add flair with each dribble, whether through a new Excite Ball control, or when you crumple the ball into the net yourself.
  - **Environmental Feedback:** Touch the pitch and feel how the surface changes, play with the ball on both ends and learn the contact surfaces that allow you to make the most of your every touch.
  - **Better Sightlines:** See beyond the box. - Guard your RB against outside forays using the new extra central defender. - Make better runs towards the wings and spaces around the box with the new additional wide peripheral players.
  - **Better Controlled Interceptions:** Get on the ball ahead and close the number one CB or winger. - Switch and combine and play deep, both in and out of possession, with the new advanced through ball. - Control space and time during runs, crosses and through balls.
  - **New Brainworks:** Advanced AI behaviours make all your players behave intelligently during your management and tactics.
  - **Mobility:** Play smart: find space, avoid contact, and use your body to control and slow down your opponents. - Find open spaces and unmarked players. - Interact with the ball cleverly to dribble with both feet and float over the top. - Position yourself to interfere and finish, and get your cards back in time.
  - **Precision Touch:** Switch control for improved dummies and shots, and make the most of any situation with elite skills like long passes and chip shots.
