The Basic Image Editing Tools The basic image editing tools allow you to crop, resize, flip, mirror, and enhance an image. Crop removes unwanted or additional parts from an image. Resize decreases the size of an image. Flip moves or reverses an image's pixels. Mirror is the same as flip but it's vertically flipped. You can also add a perspective grid to an image for aligning purposes. Enhance improves the image using one of the tool's presets, or you can customize the tool's settings.

The construct of the alter-ego is a psychological concept that was popularized by Carl Jung in his 1921 book Psychological Types. It was later formalized in analytical psychology by William James (1904). Jung claimed that every individual has two distinct personalities: the conscious, rational ego, and the unconscious, primitive id. The conscious ego has its roots in childhood and takes its form from the family. It is the person's knowledge and ego that shape the conscious
