****Converting Images**** If you have a Photoshop file that you want to convert to another format, such as a black-and-white RGB (red, green, blue) or CMYK (cyan, magenta, yellow, black) image, you can do it fairly easily. It's possible to convert individual images and then save them all as a new format, but it's often easier to convert a group of images. One way to do it is to use the Image→Convert to Color/Index/Grayscale command.

The Photoshop Elements 2019 File Formats When you open Photoshop Elements you get a standard image editor window with a large preview of your image at the bottom. You can crop the image, edit the image, add new layer styles, apply color adjustments, rotate the image, and even create a new image from your existing image. The image editor in Photoshop Elements has many of the same editing options that are available in Photoshop. In fact, this version of Photoshop Elements even supports the same file formats as Photoshop! Below is a list of the most common Photoshop Elements file types, including the file types you need to edit and save your images. Adobe PSD – Photoshop Elements' preferred file format Photoshop's own PSD file format is supported by Photoshop Elements. PSD files are used to manage layers, filters and effects in Photoshop. Adobe PSD – Photoshop Elements Layers – Photoshop's layer file format is the preferred file type used to manage all the layers in an image. Layers are the building blocks of images. Each layer can be edited, moved, resized, color-corrected, and has its own blending modes that control how the layer is composited with other layers. Some of the oldest and most useful tools and features in Photoshop are available in Photoshop Elements. The Paint Bucket tool is still there and the selection tools are pretty easy to use. On the receiving end of the hit, a girl appears to be talking in her hand cupped over her mouth. The game is gaining its share of controversy — and attention — following a New York Times report, published Monday, which claimed it was the result of discriminatory marketing of video games to children. “These companies are simply unwilling to admit that, from the launch of the original Pokémon in 1996, the goal of these games has been and continues to be aimed at children,” wrote Deirdre Fulton in the Times. The franchise that Pokémon took to the mainstream has long been beloved by children — and more than a few parents. The original was released in Japan in 1996. It introduced an adorable pocket monster, as well as trading cards that could be collected and traded. A core concept of the game was that humans could catch a specific creature while battling others. There was also a trading aspect to the game, which has allowed Pokémon to grow in popularity over the years. But some critics argue that this engagement began when the franchise released in the United States, noting that most of the Pokémon games don’t feature a lot of talking. Though playing with Pokémon remains a core part of the gaming franchise, most modern games don’t include this talking element, instead opting for the same gameplay found in the main series. Pokémon Go was released in 2016. But recently, critics have been highlighting the game’s potential to be used for nefarious purposes, like for criminal activities such as kidnapping or luring children. “A parent could potentially walk out their front door, and within minutes, their child could be in a van outside with the door unlocked with the child's picture ready to be taken,” Fulton wrote. A screenshot from the mobile game Pokémon Go that was published on Twitter. Twitter But while those who participated in Pokémon Go may have enjoyed the game, others have raised concerns about the potential negative consequences that may follow. These impacts go beyond a harm to kids. “There is no doubt that Pokémon Go has been a wild success for Niantic,” wrote Atlantic contributor Katherine Brooks last week. “The app has already been downloaded more than 300 million times and generated \$750 million since its release. But while this is undoubtedly a win for the company, there have been some very real concerns raised about the app's potential, and unintended, consequences as it has swept across the country.” Part of

]: Tossing the Government's argument out, the Court of Appeals found that the evidence was not compelling enough to establish that the class members would expect to be involuntarily sterilized if they did not submit to a mandatory IUD insertion. In fact, the Court noted, the evidence indicated that although such a policy might be applied to J.L., it was more likely to be applied to individuals who were not yet members of the class. *Id.* at 324, 491 S.E.2d at 735. The Court found, thus, that the government failed to prove that J.L. or others in her class would have a reasonable expectation that they would be subject to a forcible IUD insertion when they failed to submit to a mandatory IUD insertion. The Court of Appeals, therefore, reversed the decision of the district court and remanded the case with instructions that J.L. be declared not to be a dependent child for purposes of the FDP Act. *Id.* at 326, 491 S.E.2d at 736. [6] The FDP Act allows the fee awards in all cases involving the custody or visitation of the children. See N.C. Gen.Stat. § 50-13.6(j)(1) (1999). [7] The Court held that the North Carolina Constitution granted trial courts the discretion to award child support even where the parents' marital separation has terminated by death or remarriage. Compelling matters, however, may require support, and there is no constitutional prohibition against a court to issue an award of support to a party not determined to be the dependent child of a spouse. See *Adams*, 356 N.C. at 124, 568 S.E.2d at 110. [8] The Court held that the remarriage of a deceased parent did not in itself require the deduction of the parent's child support arrearage from the survival beneficiary's share of the parent's estate. See *Adams*, 356 N.C. at 123, 568 S.E.2d at 109. Thus, if the dependent child of one spouse survived the other spouse, the surviving spouse was entitled to support from the deceased parent's estate even though the deceased parent had other children and any support

payments were owed directly to such other children. See *id.* [9] Assuming the Supreme Court's Adams decision could be said to prevent a survival beneficiary from garnishing a claim for support accrued prior to
