Create animated screensavers that can be easily dragged and dropped onto your desktop. Full screen mode and multiple instances of each tool in multi-user mode Automatically run the tool on Windows start-up Options for launching the tool in the background Unlike the other Recycle Bin cleaner utilities, Recycle Bin Commander is specifically developed to clean the Recycle Bin rather than to waste any hard drive space. It comes packed with useful and additional features which you cannot find in other Recycle Bin cleaner software programs. It supports different Recycle Bin sizes and monitors whether the trash bin is full or not to present you the maximum available space. In addition, it lets you decide whether Recycle Bin Commander should automatically empty the trash bin to make additional disk space available or it should only offer a warning for the lack of space when you try to delete or move the files from the Recycle Bin to your Desktop. If you wish to free up even more disk space, Recycle Bin Commander supports automated removal of the applications which no longer appear in the Start menu. In the background, it backs up the files that you are currently working with, and then overwrites them. The Recycle Bin Commander interface is very easy to navigate and offers you quick access to the tools which you need to use. You can always add support for more features by getting the software upgraded. If you want to use the Recycle Bin Commander feature of backing up files, it is just a matter of clicking on the Backup Files button to launch the wizard. The wizard creates a backup file which includes the contents of the Recycle Bin, then you may run it manually whenever you want. It is a good idea to use Recycle Bin Commander on a regular basis for ensuring that you have enough room on your disk. However, it usually is a good idea to run a backup on a regular basis regardless of using the Recycle Bin Commander.
